# Andrew L. Parmelee

Oviedo, FL | 407-780-9659 | andrew@parmelee.us | Profile: www.andrewparmelee.com

## PROFILE

Graduated in May 2026 from the University of Central Florida with a Bachelor of Science in Information Technology and earned the CompTIA A+ certification in October 2026. Skilled in IT support, network administration, application development, and system troubleshooting, with hands-on experience building virtualized home lab environments using Windows Server, Active Directory Domain Services, Group Policy, and Linux helpdesk systems.

## EDUCATION

**B.S. Information Technology** May 2026

*University of Central Florida | Minor: Secure Computing & Networking | GPA 3.727*

**A.A., Information Technology Emphasis** May 2024

*Seminole State College*

## CERTIFICATIONS

- CompTIA A+ - View Credentials
- TestOut IT Fundamentals Pro

## EXPERIENCE

**Freelance Website Programming and Testing** January 2026 – Present

*StepWise/PatWise AI*

- Parttime programming support for PatWise.AI (a patent preparation/prosecution web-based application). Assisted with developing user account module (administration, forgot passwords, PIN based login, etc.)
- Testing and debugging the patent drafting software.

**Facilities & Maintenance** Aug 2026 – Present

*University Carillon*

- Set up and tear down for special and scheduled events and maintain facilities for a clean and safe environment

**Custodian & Facilities** Jul 2021 – Jan 2025

*SawWright*

- Maintained clubhouse facilities for Live Oak and Sanctuary neighborhoods in Oviedo.
- Verified clubhouse renters comply with their contracts.

## TECHNICAL SKILLS

- Hardware & Mobile Devices | Operating Systems |Networking | Virtualization & Cloud | Troubleshooting & Tools
- JavaScript | React | Node.js | Python | C# | Java | SQL | HTML/CSS | MongoDB | Unity

## HOME LABS

**Active Directory Home Lab**

- Configured a Windows Server domain controller with static IP, DNS, and NAT routing in VirtualBox.
- Set up DHCP scopes and a PowerShell script to bulk-create domain user accounts.
- Connected a Windows 10 VM to the domain, verified domain sign-ins, and fixed a gateway configuration error.

Link: Active Directory Home Lab

**File Server Permissions Lab**

- Created department folders on Windows Server, using AGDLP group nesting and disabling NTFS inheritance to control access by role.
- Applied explicit NTFS permissions for HR, Finance, IT, and Public, verifying access limits via client VM logins.

Link: File Server Permissions Lab

**Group Policy Software Deployment**

- Set up a network share and linked a startup GPO to automatically install Google Chrome across domain computers

Link: Group Policy Software Deployment

**Helpdesk Ticketing Lab**

- Installed an Ubuntu VM with an Apache, PHP, and MariaDB stack to run GLPI for tracking IT tickets.
- Linked GLPI to the domain controller via LDAP using a read-only service account to enable domain account logins and role profiles.
- Fixed multi-homed DNS lookup errors on the DC, corrected an Apache config error, and resolved LDAP search failures to enable domain authentication.
